Enterprise Architect-Contract-DU

Description

Description: Our organization is committed to nurturing the growth and development of our permanent team members. To achieve this goal, we are seeking a highly skilled Enterprise Architect on a short-term contract basis. As an Enterprise Architect, you will be responsible for providing theoretical guidance and practical insights to our permanent team members, helping them understand how to handle complex enterprise architecture challenges.

Responsibilities

- Collaborate with permanent team members to provide theoretical grounding and practical insights in enterprise architecture.
- Implement best practices in enterprise architecture, ensuring alignment with industry standards.
- Utilize frameworks and methodologies such as TOGAF, ARCHIMATE, LEAN IX, etc., to develop effective enterprise architecture solutions.
- Analyze and design enterprise architecture solutions that meet business objectives.
- Drive continuous improvement and innovation in enterprise architecture practices.

Qualifications

- Strong theoretical understanding of enterprise architecture principles.
- Proven practical experience in applying enterprise architecture methodologies and frameworks.
- Proficiency in TOGAF, ARCHIMATE, LEAN IX, and other relevant tools and techniques.
- Excellent communication and mentoring skills.
- Ability to work effectively on a short-term contract basis.
