Junior Tester-Utrecht-Hybrid

Description

As a Junior Tester, you will play a vital role in ensuring the quality and reliability of our software products. You will work closely with the development team to identify and report bugs, perform various testing activities, and contribute to the overall improvement of our software development processes. This is an excellent opportunity for someone who is passionate about software testing and wants to develop their skills in a fast-paced and dynamic environment.

Responsibilities

- Collaborate with the development team to understand project requirements and create test plans
- Execute test cases and document test results
- Identify and report bugs and issues in a clear and concise manner
- Perform functional, regression, and performance testing
- Contribute to test automation efforts and maintain test scripts
- Participate in code reviews to ensure code quality and testability
- Collaborate with cross-functional teams to ensure timely delivery of high-quality software
- Stay up-to-date with industry trends and best practices in software testing

Qualifications

- Bachelor's degree in Computer Science, Engineering, or a related field
- Strong understanding of software testing principles and methodologies
- Familiarity with test management tools and bug tracking systems
- Experience with manual testing techniques and test case creation
- Basic knowledge of programming languages such as Java, C#, or Python
- Excellent problem-solving and analytical skills
- Strong attention to detail and ability to work independently
- Good communication skills and ability to collaborate effectively with cross-functional teams
- ISTQB certification or any other relevant certifications will be a plus
