## Lead Fullstack Software Engineer-DU-Hybrid

### Description

Our client is a fast growing tech consultancy. With more than 200 energetic, ambitious and highly educated professionals, we make the difference for our customers every day. specialty? Software of the highest possible quality that does work, does go live and does make an impact. This always happens together in the client team. The formula for success? Attracting the best talent, working only with modern technology and always learning.

### Responsibilities

The job description will vary per project. To make it a bit clearer, we work on projects for larger organizations and help them with digitization. For example, for an energy supplier in the Netherlands, we migrate their low-code IT landscape to AWS cloud native serverless with typescript. 5 domains will be taken under control. A large project with more than 25 colleagues. In addition, we work on greenfield projects in which we turn an idea into reality. We are responsible for all product choices from A to Z. We make a transition to a new way of working before a project starts. New technologies, all best practices implemented, readiness assessment and drafting proposals for improvement from this point on.

### Qualifications

Hard requirements:

- A technical BSc or MSc degree in Computer Science (Computer Science) / Software Engineering, Physics, Mathematics or Aerospace Engineering
- Excellent command of both the Dutch and English language
- At least 7 years of relevant work experience in Software Development, preferably with one of the following languages: Python, Java, C#, .NET, TypeScript with Angular or React
- Experience with best practices such as continuous integration, trunk-based development, continuous delivery, test-driven development, and infrastructure as code, or willing to learn more about it.

Soft skills:

- Someone who would like to be involved in technical and product design decisions from the start. Someone who is willing to think along, give input and give advice to the customer.
