Senior Java Developer- Belgium/Antwerpen-DU- Onsite

Responsibilities

As a Java developer, you will be involved in new technologies. Each project is unique, ranging from developing a car-sharing platform, a mobile banking app to building sustainable software solutions at

Utilities. This gives you the opportunity to develop yourself within

different disciplines, environments and projects. We like to get things done and work in short sprints at our customers' locations or on in-house consultancy projects. You keep in close contact with the (internal) client and communicate clearly about the progress. With your experience and expertise, you advise the client on improvements where possible.

Qualifications

A minimum of five years of relevant experience and a technical bachelor's degree are required, along with an in-depth understanding of Java and proficiency in React, AWS, Azure, Docker, and Kubernetes.
