Full Stack Developer-Hybrid

Description

You are someone with experience and talent who gives our development team even more clout. You work in a team on customer and service projects, and have a feel for the underlying case. You get energy from sparring with the team and the customer. What is the need behind the questions the customer asks? Which solution is appropriate? How can we add certain functionalities efficiently? As a Full Stack Developer, you have an important role in contributing to a high-quality end product. You understand that quality is determined by details and work in a structured way.

The Fullstack Developer works on customer and service projects, focusing on providing quality solutions with an eye for detail. The goal is to solve customers' needs by applying technical expertise and improvements

Qualifications

YOUR SKILLS

- You have HBO working and thinking level (diploma is not required);
- You have at least 4 years of experience in web development;
- You have knowledge of Node.js, Git and ideally also of Vue.js, React and/or Nuxt;
- You have experience in working with (RESTful) APIs, GraphQL and JSON;
- You strive for high quality and have an eye for detail;
- You think about technical solutions and improvements, and apply them;
- You take responsibility and actively propagate your expertise;
- You are ambitious and want to develop yourself.

Job Benefits

- An attractive working environment in a beautiful office in the heart of Amersfoort and a stone's throw from the central station;
- Sufficient space to develop yourself;
- Challenging projects from interesting clients;
- Responsibility and participation in the optimisation of services;
- Appropriate remuneration and good working conditions;
- Collective pension scheme;
- A daily catered lunch.
